

Conservation and Restoration Datasets and Tools

Louis Keddell
Geospatial Program Manager
lkeddell@chesapeakeconservancy.org

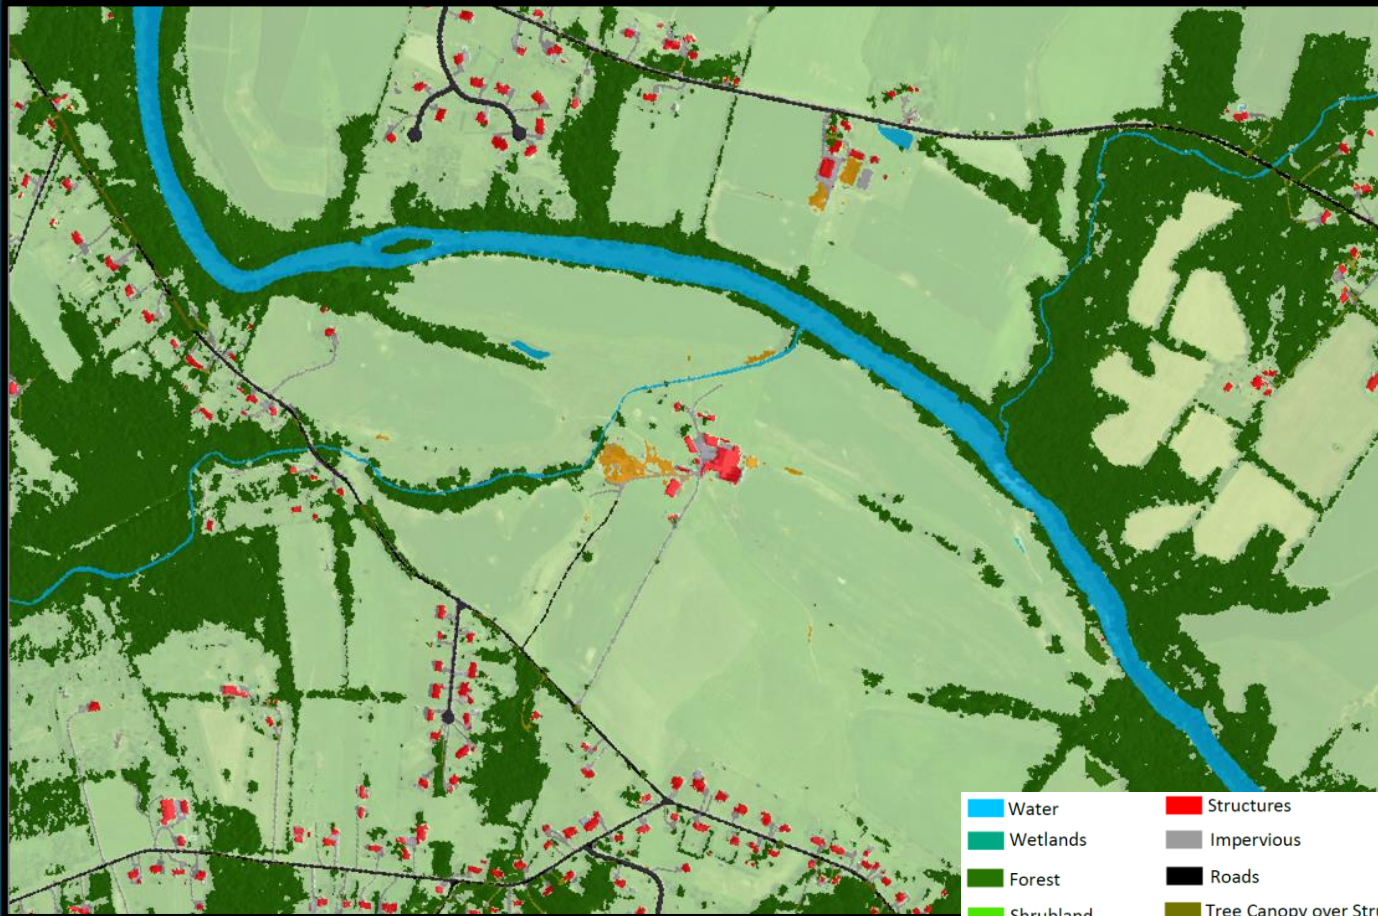

Overview

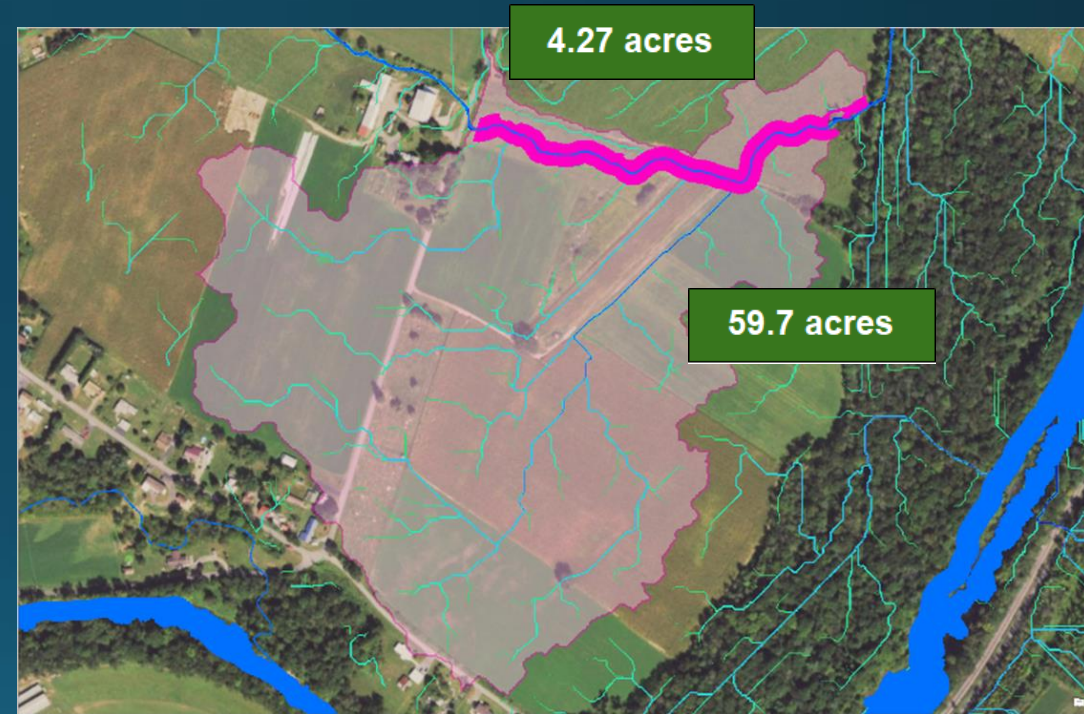

- 
- *CBP Objectives: watershed-wide datasets*
 - *Enhancing conservation and restoration*
 - *Visualizing the Data*

Precision conservation

Getting the right practices, in the right place, at the right scale.

Water	Structures
Wetlands	Impervious
Forest	Roads
Shrubland	Tree Canopy over Structures
Herbaceous Vegetation	Tree Canopy over Impervious Surfaces
Barren	Tree Canopy over Impervious Roads

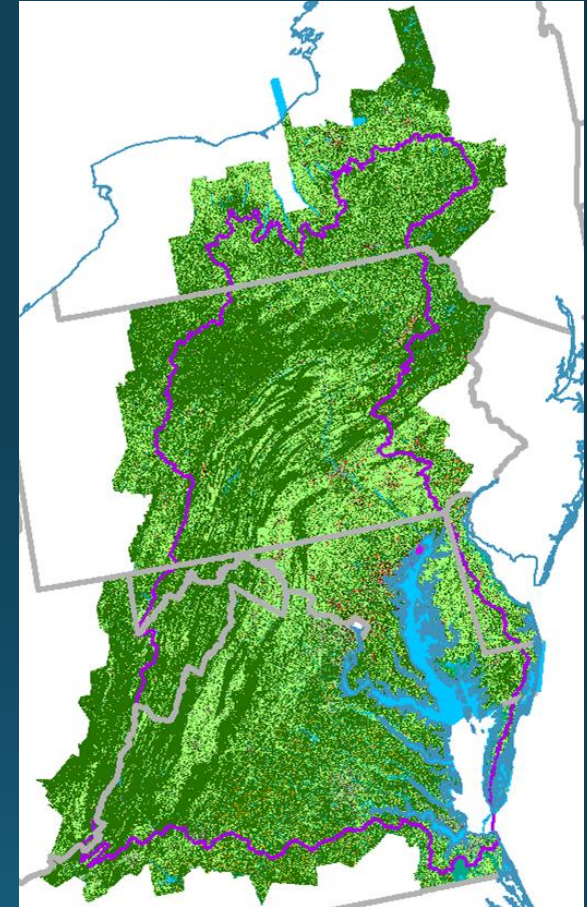

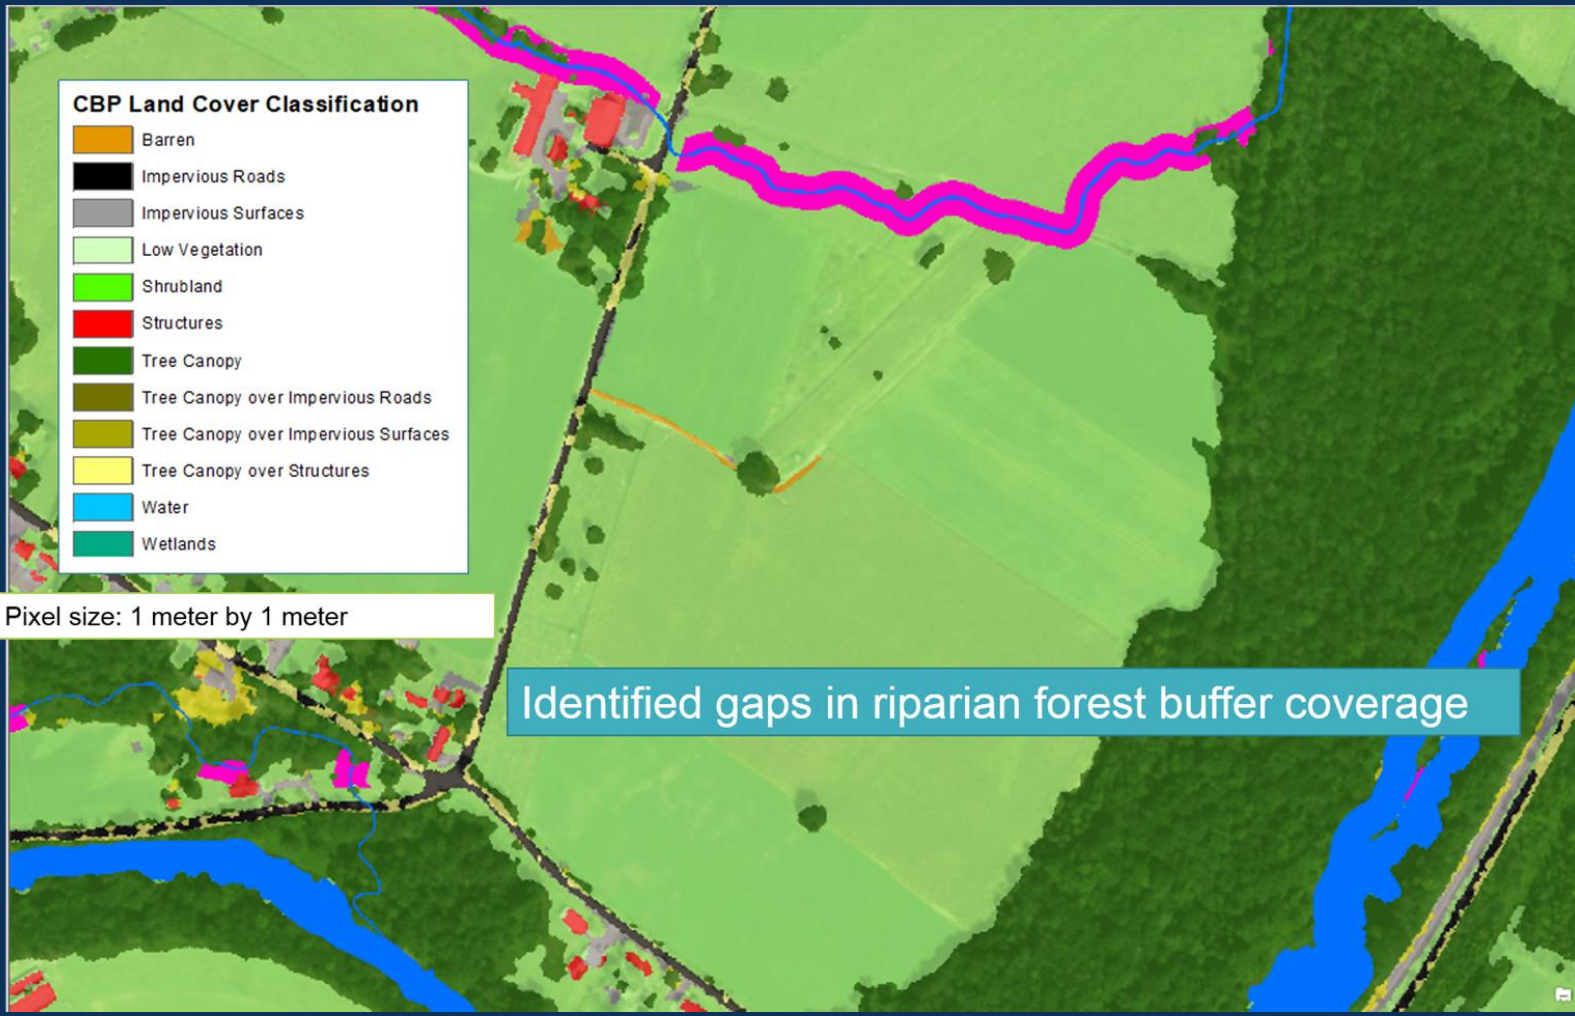

6-year Cooperative Agreement with the Chesapeake Bay Program

- Objective 1: High resolution Land Cover and Land Use
- Objective 2: High resolution Hydrography and Ditch Mapping
- Objective 3: BMP Opportunity Mapping
- Objective 4: CBP Geospatial Support

BMP Opportunity Mapping

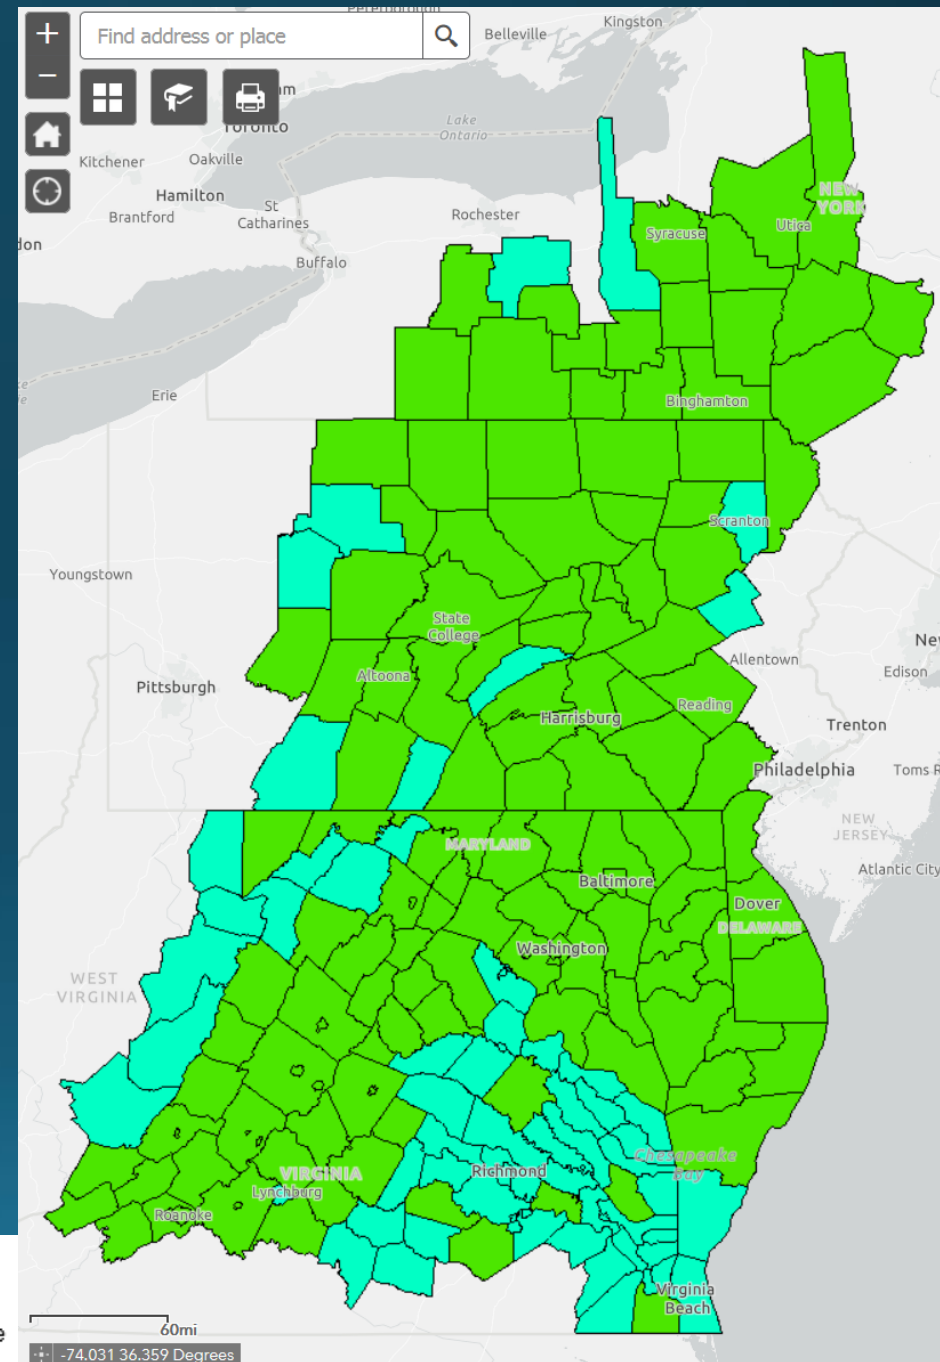

- BMP opportunity layers as a reference resource:
 - Streamline watershed planning
 - Engage wide audience
 - Potential opportunities for suite of practices
 - Starting point for more efficient field visits
 - Data to support funding proposals

Schematic Illustration of Several In-Field and Edge-of-Field Buffer Types (photo courtesy of USDA-NRCS).

High resolution datasets schedule

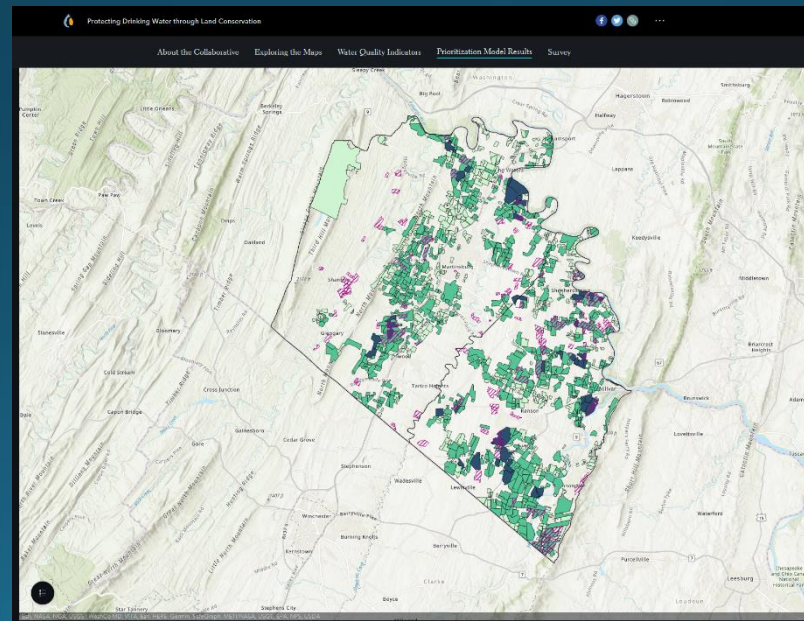

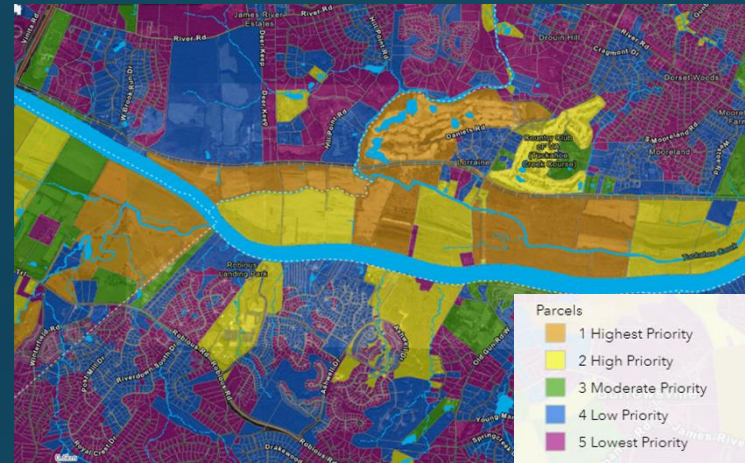

- High Resolution Land Use/Land Cover (HRLULC)
 - 2013/14 HRLULC available
 - 2017/18 HRLULC (late 2021)
 - 2021/22 HRLULC (TBD, pending imagery release and review)
- Hyper Resolution Hydrography
 - (TBD, dependent on data availability and review)
- BMP Opportunity Datasets
 - (TBD, dependent on data availability and review)
 - Maryland statewide Riparian forest buffer opportunity dataset
 - 2013/14 HRLC and EFP hydrography (Fall 2021)
 - Updated 2017/18 HRLC and EFP hydrography (expected 2022)
 - Updated 2021/22 HRLC and HRH hydrography

Visualizing the Data

- Prioritization tools
 - Common units of interest: by parcel, sub-watershed
 - Field scale restoration and conservation opportunities
- Web tools
 - Outreach and Education
 - Identifying potential projects
 - Coordination and Planning
 - Tracking progress of implemented projects
 - PDF Report Generation

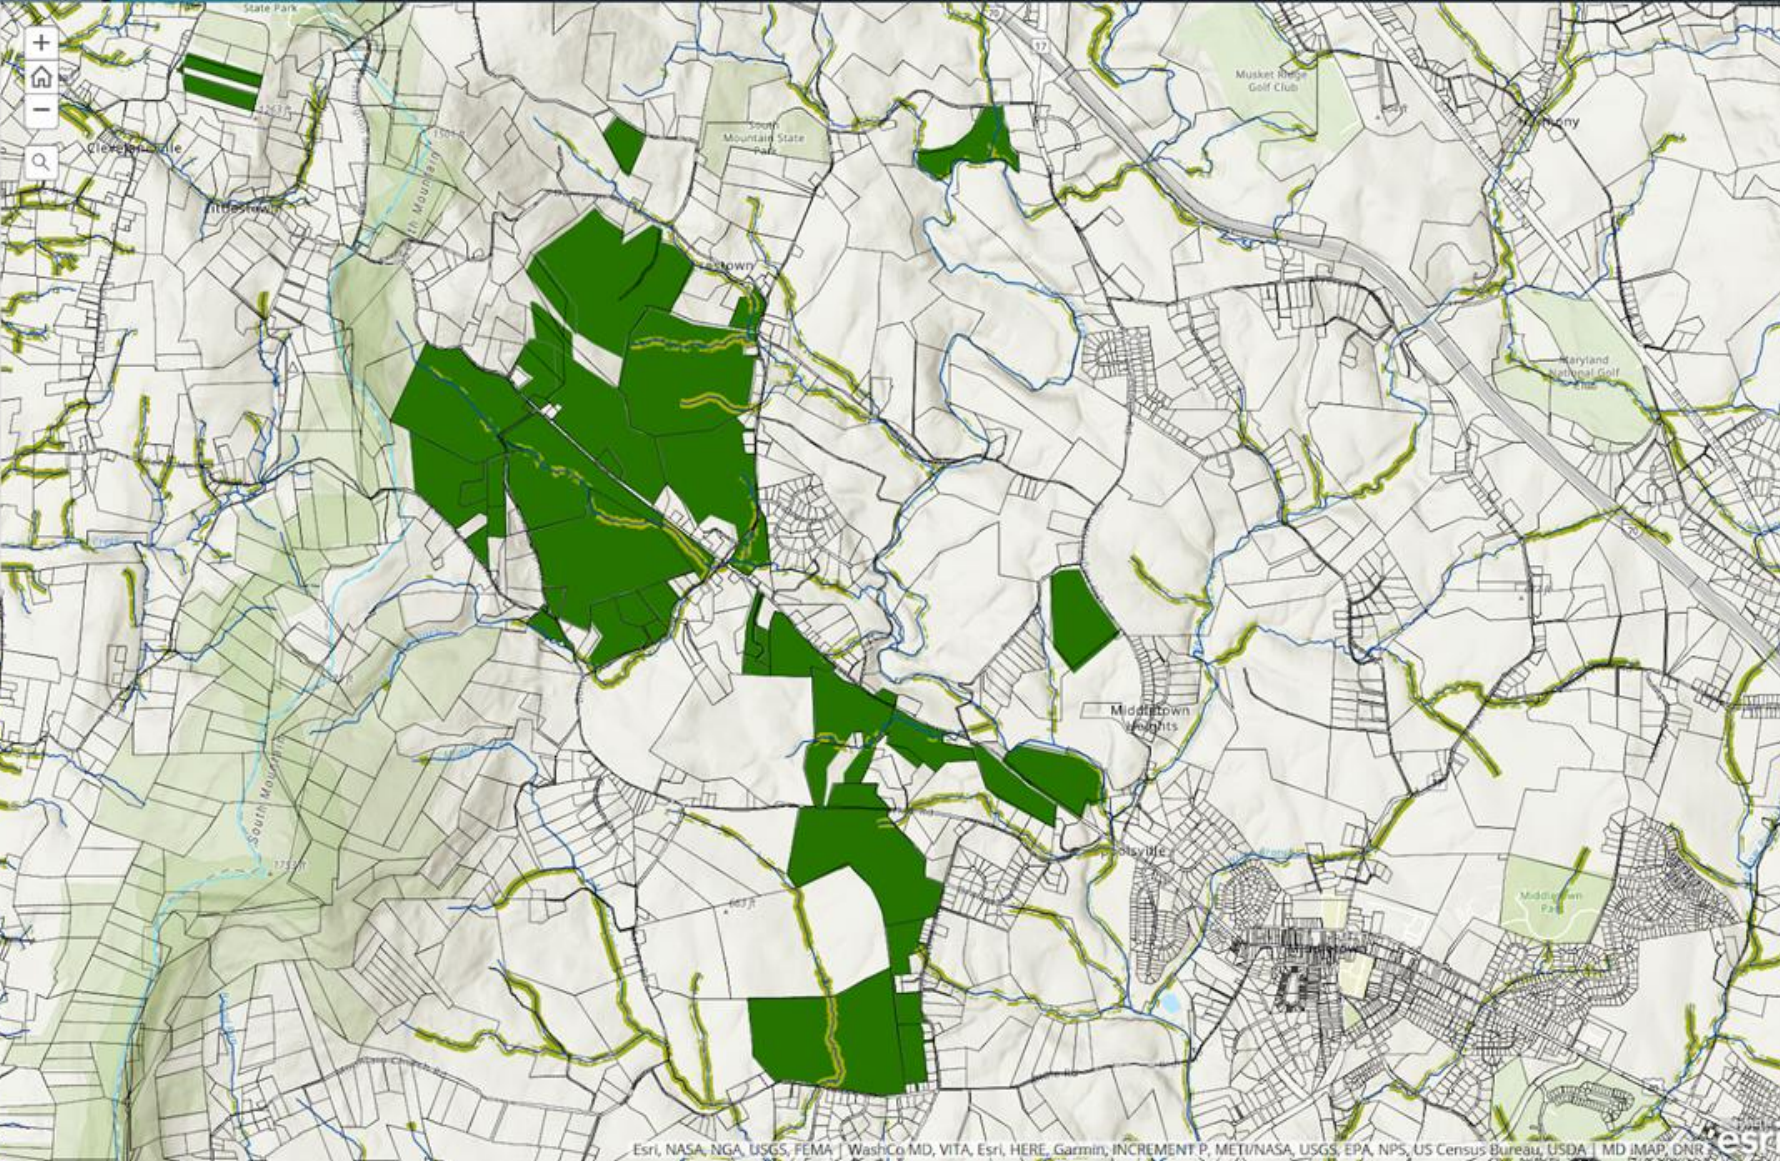

Conservation and Restoration in the Antietam/Catoctin Watershed

- The Chesapeake Landscape
- Maryland Environmental Trust
- Land Conservation
- Restoration Actions
- Antietam/Catoctin Watershed**

Explore the parcels within the Antietam/Catoctin watersheds to see where there are opportunities for riparian buffer restoration projects!

- Parcels**
- Streams**
- Riparian Buffer Restoration Opportunities**
- MET Properties**
- 8 Digit Watersheds**

Tree Canopy

Source: Chesapeake Bay High Resolution Land Cover from Chesapeake Conservancy Conservation Innovation Center, [WVU GIS Clearinghouse](#). Erased the 100' riparian forest buffers from the tree canopy layer to create this indicator.

Measurement: Acres of tree canopy

Justification: "Forests are the most effective land cover for maintenance of water quality. They serve as natural sponges, collecting and filtering rainfall and releasing it slowly into streams. Forest cover has been directly linked to drinking water treatment costs – the more forest in a source water watershed, the lower the treatment costs", [Common Waters Fund](#).

Layer List

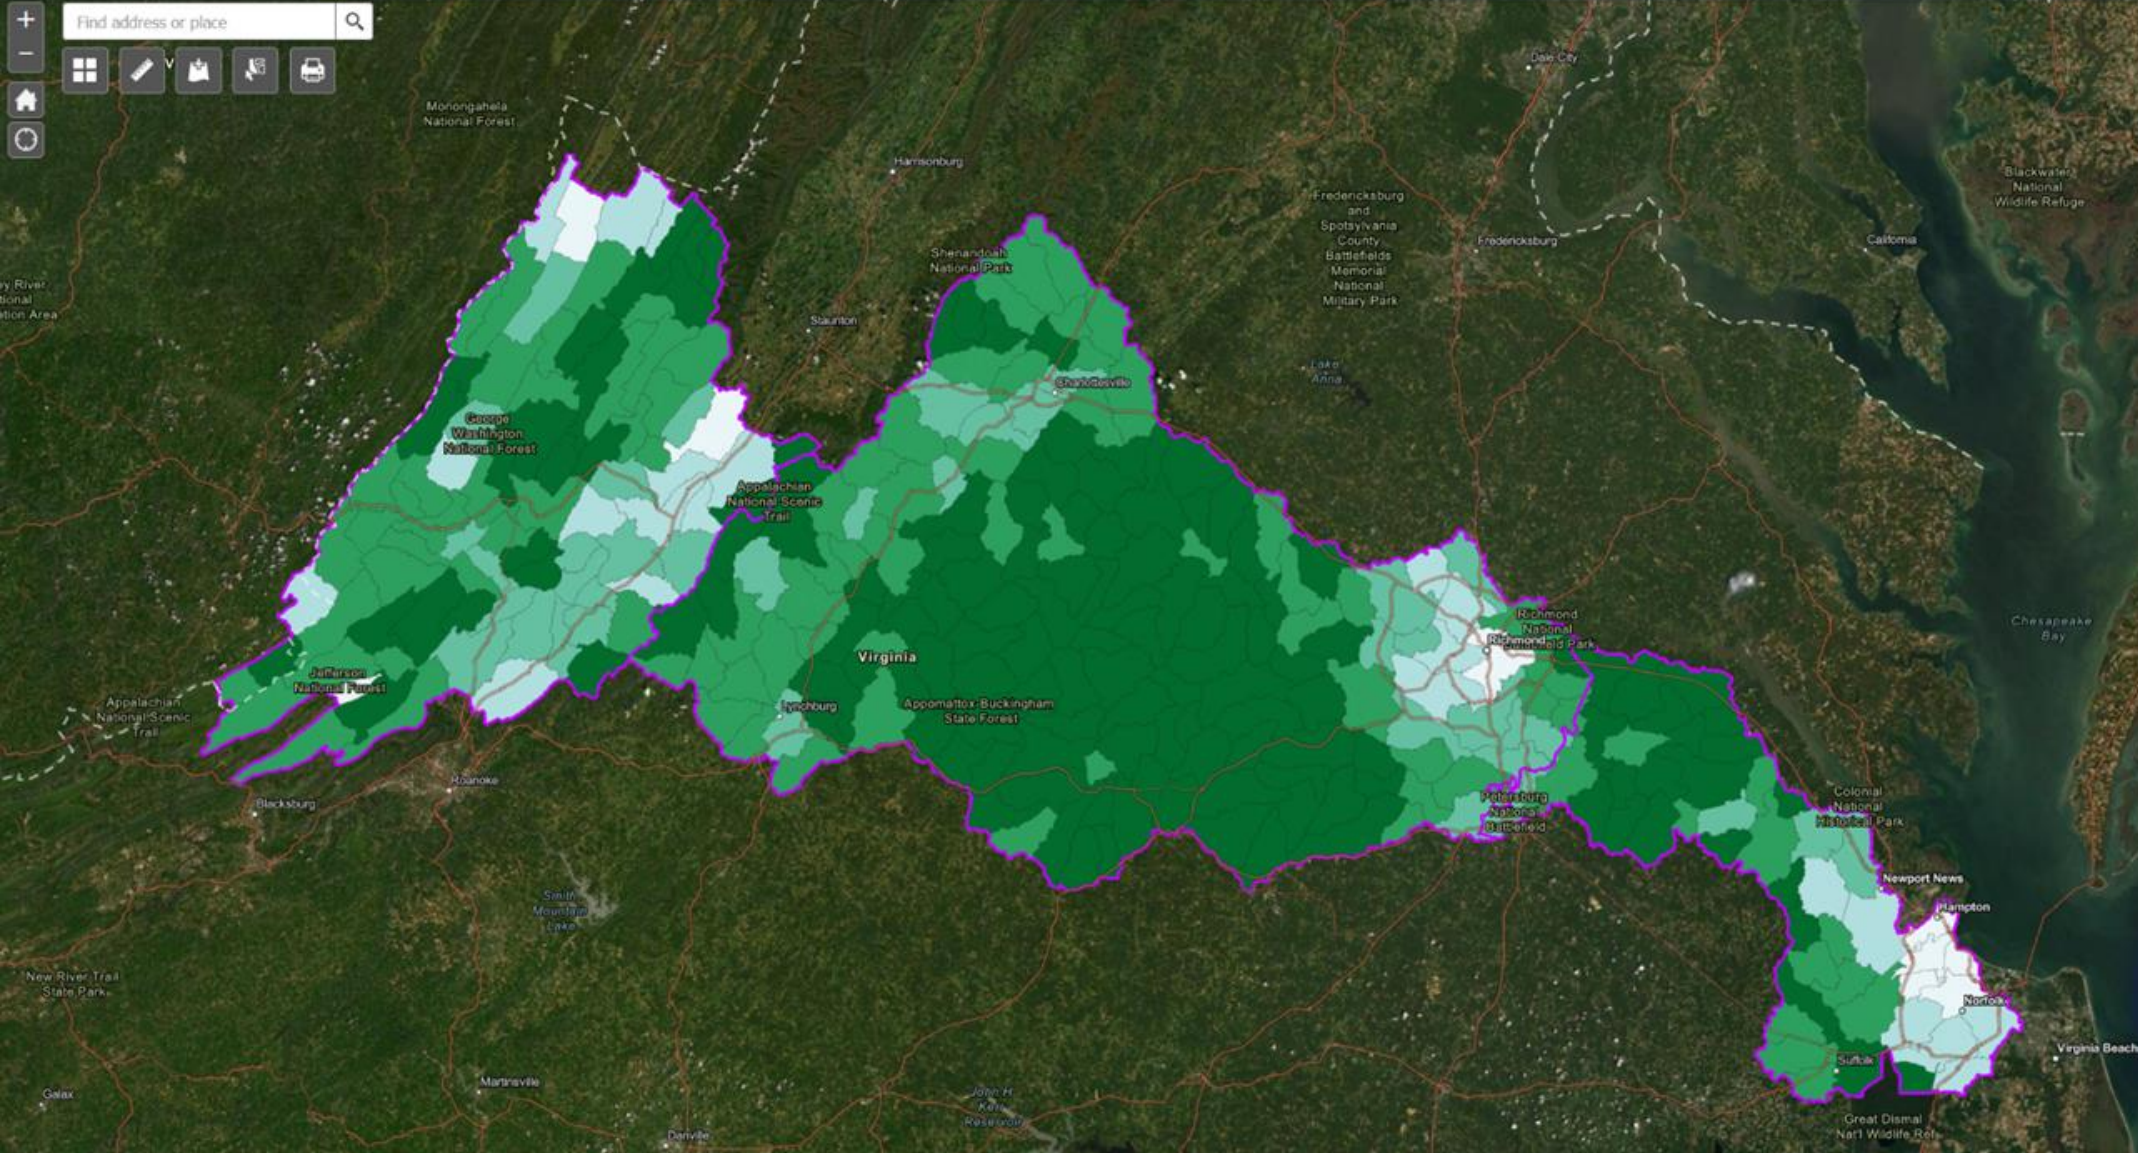

Layers

- Safe Water Conservation Collaborative Prioritization Map
- Area of Interest
- Conserved Lands
- Drinking Water Protection Areas
 - Wellhead Protection Area
 - Zone of Critical Concern
 - Zone of Peripheral Concern
- Properties with Compatible Land Uses
 - 100 - Residential Vacant
 - 101 - Residential 1 Family
 - 102 - Residential 2 Family
 - 103 - Residential 3 Family
 - 112 - Active Farm
 - 113 - Inactive Farm
 - 114 - Conservation easement perpetual
 - 300 - Vacant Commercial Land
- Parcel Prioritization
 - Most Valued Lands
 - Valued Lands
- Hybrid Reference Layer
- World Imagery

Map navigation controls: Home, Full Screen, Print, Refresh, Search, Zoom In, Zoom Out, Scale, Rotate, Measure, Draw, Erase, Copy, Paste, Undo, Redo, Close.

Layer List

- Boundary Layers
- Ecological Layers
- Prioritization Datasets
 - HUC 12s Percent Buffered 35'
 - 6 - 54
 - > 54 - 72.9
 - > 72.9 - 83.3
 - > 83.3 - 91.5
 - > 91.5 - 99.9
 - Enhanced Flow Paths
 - Drainage Areas
 - Lower James Prioritization Layers
 - Middle James Prioritization Layers
 - Upper James Prioritization Layers
 - Restoration Opportunity Areas 35'
 - Restoration Opportunity Areas 100'
 - Parcels
 - 1 Highest Priority
 - 2 High Priority
 - 3 Moderate Priority
 - 4 Low Priority
 - 5 Lowest Priority
 - County Nitrogen Reduction Goals by Subsources (lbs/yr)
 - County Phosphorus Reduction Goals by Subsources (lbs/yr)
 - County Sediment Reduction Goals by Subsources (lbs/yr)
 - Estimated Soil Loss (tons/year) RUSLE
 - VA High-Resolution Land Cover

RESTORATION REPORTS

Precision conservation for your property

If you are a landowner in Adams, Clinton, Centre, Dauphin, Huntingdon, Lancaster, Lebanon, Lycoming, Perry, or York counties, Pennsylvania, this free, confidential tool can help you get information about restoration opportunities on your property that can improve the ecological conditions you care about.

Using state-of-the-art data analysis, Restoration Reports generates a customized report for your property, including the watershed you are a part of, the wildlife species that may live on your property, and whether you are in close proximity to an impaired stream.

You can then select your management priorities, for example, improving the hunting and fishing on your property, or supporting your agricultural land uses.

Get started

1. Explore your property

PARCEL IDENTIFIER
38H11-0021--000

WATERSHED
Rock Creek

LAND COVER COMPOSITION (ACRES)

Land cover type	Within parcel
Tree canopy	27.70
Tree canopy over impervious surface	0.17
Shrubs and wetland	0.00
Low vegetation	112.69
Bare earth	0.00
Impervious surface	1.51
Water	0.00

ACREAGE OF RESTORATION AREA

2.77 acres

ACREAGE OF DRAINAGE THROUGH RESTORATION AREA

163.45 acres

2. Select your management priorities

Agriculture

Restoration can help manage nutrients and improve soil and livestock health.

Recreation

Hunting, fishing, and exploring your property safely.

Wildlife

Young and mature forests and the species that inhabit them.

Thank you!
